The Radio HF Internet Newsletter is distributed monthly, free of charge, to subscribers by e-mail. The Newsletter is a collection of web sites specifically related to radio (AM/FM, shortwave, Internet radio, amateur radio, scanning and CB), communications, telecommunications, radio memorabilia and collectibles, media, journalism, science, technology, space and astronomy, weather, transportation, plus some fun things thrown in for good measure! Each edition includes links to web sites submitted by subscribers or by the editor. All sites are reviewed, verified and presented to you, with the URL, and a brief description of each site.

The Newsletter arrives in your in-box as an easy to read e-mail as well as an attached PDF version, with no fear of viruses. The subscriber list is secure, private and confidential. It will never be sold, redistributed or displayed.

Subscribers are encouraged to submit web sites for inclusion in future editions of the Newsletter. All contributors whose sites are published will receive a 2% discount on their next purchase from Radio H.F. The e-mail address for all contributions, comments, and subscription requests is hfnewsletter@yahoo.com mailto:hfnewsletter@yahoo.com

Welcome to the July issue the Radio HF Newsletter. A belated Happy Canada Day and U.S. Independence Day to all of our Canadian and American subscribers. I'm not sure where the month of June went. It flew by so quickly that I got a late start on the July Newsletter, so it is going to be somewhat later than usual. Thanks for your patience. I do have to admit though that I have spent a lot of time the last two weeks watching the Wimbledon tennis championships coverage on TV. It would be great to see an 8th Wimbledon title for Roger Federer.

The dog-days of summer have gotten off to an early start here in the Montreal area with temperatures reaching mid-summer levels early this year. I hope you're keeping cool wherever you are. Cool things are happening in Montreal over the next few weeks as the Just for Laughs comedy festival and the Fantasia Film Festival both hit town.

Our Monthly Special Zone for July includes web pages on World Population Day, Nelson Mandela Day and the National Day of the Cowboy.

This month's virtual voyage around the world, in the "Where in the World Zone", takes us to the south-western coast of Africa, to Namibia. Officially the Republic of Namibia, it is the former South West Africa, a country whose western border is the Atlantic Ocean. It shares land borders with Zambia and Angola to the north, Botswana to the east and South Africa to the south and east. Although it does not border Zimbabwe, less than 200 metres of the Zambezi River (essentially a small bulge in Botswana to achieve a Botswana/Zambia micro-border) separates them at their closest points.

Let's get down to business with this month's collection of web sites.

Ham Hijinks is a satirical ham radio news organization; the brainchild of the award-winning Noise Blankers Radio Group of former journalists and communications professionals. Our philosophy is simple – let's laugh at ourselves every once in a while. We love the ham radio hobby very much. But we never, EVER want to take it so seriously that we become old curmudgeons. Let's face it, our hobby has some stereotypes and behaviors that leave us shaking our heads. But that's okay. Roll with it. Laugh with it. Have fun.

RADIO H.F. BOOK REVIEW ZONE

EDITOR: T. J. "Skip" Arey

2015 Shortwave Frequency Guide (Klingenfuss) – 19th Edition
400 Pages - ISBN: 978-3-94104-065-6
$59.95 US or $69.95 Canadian

OK, right off the bat, you want to know why I am reviewing this book in the Ham Radio column. Actually, if you are active on the bands, the reason becomes self evident. Very often, hams find signals in the amateur frequency allocations that are non-ham in nature. The Klingenfuss Guide has a long history of helping hams get a handle on all those things that might not otherwise make sense.
This guide covers the latest schedules of clandestine, domestic, and international broadcast stations worldwide. It was compiled by a new team of international top experts assisted by experienced collaborators and monitors from around the globe.
The 2015 Shortwave Frequency Guide features a gigantic broadcast frequency list with thousands of entries, and a superb alphabetical list of stations as well. Even more entries cover utility stations worldwide (Red Cross, United Nations and more).
With clearly arranged frequency and schedule tables, year after year, these famous databases are totally revised from scratch. This is the most up-to-date worldwide shortwave radio handbook available today!
The book is an exhaustive and accurate list of broadcast and utility radio signals that share the shortwave spectrum with amateur radio. Also, given that many modern HF ham rigs also allow for General Shortwave Coverage, it is sometimes fun to spin the dial between the ham bands and see who else is out there. A great addition to your tactical resources for HF radio practice.

Available in the US from the American Radio Relay League and in Canada from Radio HF

RADIO H.F. PUBLICITY ZONE #3

What is new in books & publications from the American Radio Relay League, the Radio Society of Great Britain, and other publishers?

ARRL's Portable Antenna Classics
Portable operating is gaining popularity in the Amateur Radio community. For amateurs who are unable to install permanent outdoor antennas at home, portable installations are often the only way they can get on the air. There are also amateurs who simply enjoy operating outdoors, in nature. For them, portable antennas are necessities.
ARRL’s Portable Antenna Classics is a collection of helpful articles gathered from more than three decades of QST, ARRL’s membership journal. Featuring easily constructed antenna systems that offer adequate performance, this book offers practical ideas and projects to get you on the air from anywhere:
HF Antennas
Single and multiband designs for all bands from 80 through 10 meters.
VHF/UHF Antennas
Antennas for 6 meters, 2 meters and even 70 centimeters.
Masts and Other Supports
Ingenious ideas for getting your portable antenna off the ground and keeping it there.

Antennas Mastered
By Peter Dodd, G3LDO
Peter Dodd, G3LDO, has long been acknowledged as one of the leading experts on antennas in the world. For over a decade he has been the regular antenna columnist of the Radio Society of Great Britain's journal RadCom. This book brings together in a scrapbook format his work from this regular column and a collection of other antenna articles from over the years that have appeared in RadCom.
Antennas Mastered is packed with everything imaginable connected with antennas. Readers will find practical solutions that cover all bands, antenna types, Meters, Software and much more. Peter set out the intention in writing the 'Antennas' column was as he stated "The main purpose of this column is to address problems readers may have installing and adjusting antennas from suburban sites that may be regarded as a challenge; although any antenna subject that is considered to be of interest to readers will be discussed or described". This has held

true over the years and readers will be staggered by the breadth of material covered in over 280 pages of antenna gold.
